Thank you so much for the quick reply and all the information, Dr. Lasee. This information is great. Hopefully the lab still has the unused pesticides.

I am glad that you are currently with EPA. Wishing you the best.

Yaorong

Subject: PFAS in insecticides

Hello Dr. Qian,

I have attached an excel sheet with the products, manufactures, PFOS concentrations, and any identifying numbers I found. Additionally, I have attached images of each of the tested containers. I only recorded lot#s if they were labeled as such, there are a great deal of other number on the products that might constitute lot#s.

I am currently working with the USDA in Lubbock to get ahold of the products I tested (they believe they might still have the same product), the Massachusetts DEP has requested them for sampling as well. I am also speaking with the lab I did the work in to see if the vials of the tested insecticides still exist. I will let you know if I can get them for you.

Feel free to ask me anything else,

Steven Lasee, MS PhD
